The Fantasy Sports M.D.

"Because losing hurts"

Dr. Alan Knopf is the Fantasy Sports M.D.

Player injuries can make or break a fantasy season. Once the draft has occurred, fantasy players' skill at dealing with injuries when adding, dropping, starting, and benching players will determine their success. While various sources provide basic injury information, Doctor Knopf, with over 35 years of experience as an orthopedic surgeon, provides both detailed injury explanations and insight into how those injuries will impact fantasy strategy.

Dr. Knopf's fantasy sports injury reports are available on the nation's leading fantasy sports news and analysis website:
