**U.S. Environmental Remediation Expert Advises Chinese Agency**  
*Dr. James Dragun Assists with Biological Remediation of Industrial Contaminant*

In April 2008, Dr. James Dragun was part of a contingent of business representatives that took advantage of the Automation Alley sponsored China – Viet Nam Trade Mission Trip. Automation Alley is Michigan's largest technology business association ([www.automationalley.com](http://www.automationalley.com)).

Dr. Dragun, President of The Dragun Corporation, is recognized for his work in solving complex environmental issues. He is an authority on the “fate of chemicals in the environment” and has authored/co-authored several books on environmental chemistry, soil pollution, and soil cleanup.

While in China, Dr. Dragun had several very productive meetings. One of the meetings was with Dr. Jinghua Jin, from a Chinese environmental protection organization. Following several correspondence with Dr. Jin, Dr. Dragun has been asked to assist in designing an optimal method to remediate soils impacted with industrial pollutants in Beijing. Dr. Dragun has also been asked to return to China as a visiting scholar.

Dr. Dragun said, “This is a very exciting opportunity for The Dragun Corporation, and we certainly hope to be able to apply our knowledge and experience to facilitate their environmental cleanup goals.”

The Dragun Corporation is an environmental consulting firm with offices in Farmington Hills, Michigan and Windsor, Ontario, Canada. They have worked on projects across North America, as well as overseas. The Dragun Corporation provides environmental consulting services to the business and legal communities.

For more information about The Dragun Corporation, go to [www.dragun.com](http://www.dragun.com) or call their Farmington Hills, Michigan office at 248.932.0228.
