## **Environmental Remediation Expert Receives Life Achievement Award** *Dr. James Dragun Honored by International Conference Committee*

On October 21, 2008, Dr. James Dragun received the “Life Achievement Award” from The Annual International Conference on Soils Sediments and Water. Dr. Dragun has been a featured speaker/instructor at the international conference for more than 15 years.

Dr. Dragun was recognized for his work in solving complex environmental issues. An authority on the “fate of chemicals in the environment,” Dr. Dragun has written and lectured extensively on the science of environmental remediation. He has evaluated sites of national and international concern including Dioxin in Missouri and the oil lakes in Kuwait caused by the 1991 Persian Gulf War. Dr. Dragun has also been an invited instructor in Canada, Italy, and Japan.

Dr. Dragun said, “I am honored and humbled to receive this award. I am very fortunate to be able to daily, pursue my passion. Recently, I have been reminded how truly blessed I am to do this work that I love. In one instance, we had a client actually cry with joy because we save him so much money. In another instance, I was greeted with a hug from a grateful client for their big victory in court. That makes it all worthwhile!”

The Dragun Corporation is an environmental consulting firm with offices in Farmington Hills, Michigan and Windsor, Ontario, Canada. They have worked on projects across North America, as well as overseas. The Dragun Corporation provides environmental consulting services to business and legal communities.
