Landmark Restorations	

Gogulski & Associates, Inc., Las Vegas, NV

1999 to Present

President

Consulting and forensic engineering services for attorneys, contractors and insurance companies. Assignments utilize the discipline of civil engineering, construction management and general contracting. The focus is on the proper execution of contractor-owner-architect-engineer responsibilities, quality control, accident investigations, OSHA compliance, dispute resolution and claims. Provided expert testimony on several personal injury cases, accidents, site safety, and evaluation of existing construction for contract compliance. Testified at trial, and wrote numerous reports which led to settlement. Defended an architect in litigation from a Nevada public agency. Wrote a report which led to settlement regarding a prison construction project in Alaska. Defended the Hertz Corporation in a wrongful termination claim by a general contractor.

Consulting assignments include: (1) Project Manager for a civil engineering firm in Las Vegas; (2) Quality Control Manager for two general contractors on U.S. Army Corps of Engineers projects, (3) Consultant for general contractor on an apartment project in Carson City, Nevada, (4) Consultant to an Oregon based general contractor on a historic restoration project, (5) Material witness during construction of the Venetian Casino Resort Hotel in Las Vegas, (6) Delay analysis and dispute resolution as a team member of experts hired by the insurance company regarding the Las Vegas Monorail construction. (7) Prepared claims for a Las Vegas earthmoving contractor.

New York City School Construction Authority, New York 1997 to 1999

Project Officer

Oversaw the design, construction and close out of 22 school construction and renovation programs. Supervised engineers, construction managers and contractors, achieving overall objectives for quality, time and budget. Promoted to the corporate office for administrative improvements in cost control for this agency which was overseeing one billion dollars in expenditures per year.

New York City Transit, New York

1994 to 1997

Project Manager

Oversaw construction, administered change orders, supervised engineers, progress reporting, and customer satisfaction for: (1) a two mile subway tunnel rehabilitation; (2) Column and roof replacement over an active subway station, (3) Construction of a new underground fan chamber, replacing existing equipment with four 78,000 CFM fans, installing electrical distribution equipment and communication equipment, and relocating utilities in the street.

Gogulski & Co. – Princeton, NJ 1991 - 1994

Principal

Supervised the restoration of the *Alexander Hamilton U.S. Customs House* in New York City as consultant to the general contractor and presented a proposal to the **Smithsonian Institution** in Washington D.C for the US

Indian Museum. Completed construction of a US Navy facility in Staten Island as Quality Control Manager for the general contractor. Prepared numerous claims, and testified as expert witness on a diverse range of construction and design issues.

NICO Construction Co. - New York

1988 -1991

Project Manager

Estimated, bid, and supervised Class A office building renovations in New York City including but not limited to : 575 Madison Ave (12 stories), renovation of BBDO (51st & 52nd floor at Radio City), Neiman Marcus in White Plains, Lehman Brothers (7 stories). Responsibilities included permitting, purchasing and field supervision for this one billion dollar annual budget general contractor.

Drexel Properties - Dallas to DKM Properties - Princeton 1983- 1986

Vice President and Director of Construction

Profit and loss responsibility for four-state general contracting business. Hired and trained staff of 150 Project Managers, Estimators, Superintendents and Craft personnel. Completed large scale residential projects, including site development, 3000 units and valued at \$60 million.

Ralph M. Parsons, Yanbu, Saudi Arabia

1983- 1983

Successfully completed a short term contract in infrastructure construction including a seriously delayed \$30 million project. Started up a new 1 square mile development. Obtained Parsons highest rating of personal performance.

George A. Fuller Co. - Boston

1983 - 1983

Project Manager

Assume control of landmark ten-story office building renovation following failed efforts by multiple previous contractors. Completed project on schedule and within budget.

Teradyne Inc. - Boston

1979 - 1983

Director of Facilities

Reporting to the CEO with both line and staff responsibility for a 75 person department. Responsibilities included construction, planning, maintenance, leasing, plant operations, security, transportation and telecommunications. Responsible for design and construction of new manufacturing facilities throughout country, including new 12-story corporate headquarters.

Kaiser Engineers - Boston, MA

1977 - 1979

Director of Development

Supervised four architectural firms and two consultants for Metropolitan Boston Transit Authority's \$750 million Southeast Corridor Project. Included are: seven subway stations, two Amtrak and four transit lines, five miles of park land, 36 bridge renovations, and five miles of roads. This project won the President's award by the National Endowment of Arts, and was listed as Outstanding Engineering Achievement of the Year in 1988 by the American Society of Civil Engineers.

Lanning Corporation – Boston, MA

1972 - 1977

Director of Construction

Built six K-Mart Shopping Centers in three state areas.

WED Enterprises (Disney) – Orlando, FL

1969 - 1972

Owner's Representative

Oversaw design and construction of the **Contemporary Resort Hotel**, an AIA award winning project. Supervised a staff of 12 engineers including 2 architects from Welton Becket.

Additional professional experience:

Starting with **Bechtel Corporation** in San Francisco, I grew in progressively more responsible assignments to Project Manger for general contractors. Assignments included renovation of a Navy base into a missile facility on Kwajalein, Marshall Islands.

As Project Superintendent for the **State of Michigan's Building Department**, I oversaw construction of a hospital addition and a laundry building together with a college expansion program at Northern Michigan University which included a boiler plant, a science building, and a utility distribution system. .

As Resident Construction Manager for General **Electric's Real Estate and Construction Operation** in Schenectady New York, I completed six (6) industrial construction projects in the east coast, all on time within budget.

Managed over one billion in new construction nationwide. Earned outstanding reputation for the ability to take charge of poorly-managed and behind-schedule projects, reorganizing them to achieve and surpass all objectives.
