

# Chemir/Polytech Laboratories

---

Chemir/Polytech assists customers involved in litigation with laboratory analysis and testing. This may include analysis to back up a patent claim or to determine why a product or material failed.

Our scientific staff also serve as expert witnesses in many major legal cases. Our experts have a diverse background in polymer, inorganic, organic and analytical chemistry as well as materials science and industrial processes. We will approach your problem with a broad perspective based on our technical training, research in academia and experience in industry.

## **The types of cases we have worked on include:**

- Patent infringement
- Trade secrets
- Product liability
- Product failure
- Insurance claims
- Personal injury

## **We can assist with:**

- Laboratory analysis and testing
- Trial preparation
- Interpretation of technical data
- Critical review of opposing data
- Written expert opinions on chemistry-related topics
- Depositions and trial testimony

## **Customers who use our litigation support services include:**

- Private law firms
- Major insurance companies
- Manufacturing companies
- Municipalities
- Public defenders
