

JENNIFER DEVINCENT

BSN, RN, RNC-NIC, C-EFM

(781)799-4662 / 54 Midland Drive, Waltham, MA 02451 / jenniferdevincent@legalnursesolutions.net

PROFESSIONAL PROFILE

I am a dedicated healthcare professional and nurse clinician with over 23 years of experience at Mass General Brigham, a nationally recognized leader in obstetrical and neonatal care. My practice is rooted in a high-acuity Level III perinatal center, where I specialize in caring for patients across the antepartum, labor and delivery, postpartum, and neonatal intensive care continuum. I hold board certification in Neonatal Intensive Care Nursing (RNC-NIC), certification in Electronic Fetal Monitoring (C-EFM), and I am a certified instructor for the Neonatal Resuscitation Program (NRP), reflecting advanced expertise in neonatal stabilization and resuscitation.

My training includes physiologic birth practices, advanced fetal monitoring, and the management of obstetrical emergencies, including interpretation of fetal heart rate tracings, oxytocin administration, management of hemorrhage and hypertensive disorders, and support for both unassisted and operative births. I have more than 18 years of experience in a large Level III NICU caring for extremely premature and medically complex infants, where I developed strong skills in respiratory support management, hemodynamic stabilization, medication administration, and coordination of multidisciplinary care. I also play an active role in perinatal bereavement and palliative care, providing compassionate, family-centered support to those experiencing perinatal loss.

In every setting, I strive to bring calm, effective leadership to high-pressure situations. My core strengths include critical thinking, precise clinical assessment, timely escalation of care, and clear communication with physicians, colleagues, and families. I am committed to evidence-based, family-centered practice and continuous professional growth, maintaining advanced certifications, participating in specialized education, and remaining active in key professional organizations in obstetrics, neonatology, and nursing. My dual specialty in labor and delivery and neonatal intensive care allows me to understand and speak to the full continuum of maternal–fetal and neonatal care—from admission through delivery, resuscitation, and postnatal course.

AREAS OF EXPERTISE

Obstetrical Care | Obstetrical Emergencies | Electronic Fetal Monitoring | Newborn Resuscitation | Antenatal Care
Postnatal Care | Neonatal Intensive Care | Vacuum Assisted Delivery | Forceps Assisted Delivery | Cesarean
Delivery | Maternal Fetal Hemorrhage | Oxytocin | Magnesium | Maternal and Fetal Palliative Care and
Bereavement | Standards of Care | Evidenced Based Practice | Research and Analysis | Compassionate Care

WORK EXPERIENCE

Registered Nurse - Labor and Delivery, December 2021 - present

Mass General Brigham - Boston, MA

Providing expert nursing care in a high-acuity Level III perinatal center, managing patient care throughout the antenatal, labor, delivery, and postpartum periods.

Key Initiatives:

- Conduct comprehensive assessments and deliver exceptional care to patients, including those undergoing cesarean sections, throughout the pre-operative, intra-operative, and post-operative phases.
- Effectively manage obstetrical and neonatal emergencies, ensuring timely and appropriate interventions to safeguard the health and well-being of mothers and newborns.
- Actively participate in the bereavement committee, offering compassionate support and care to families experiencing perinatal loss and neonatal deaths.
- Collaborate with interdisciplinary teams to enhance patient care practices and improve outcomes, fostering a family-centered approach to healthcare delivery.
- Collaborates closely with physicians in regard to fetal monitoring strips during labor, delivery, and surgical procedures.
- Maintains meticulous records and effectively communicates patient conditions with physicians and through electronic medical records.
- Delivers comprehensive patient and family education on labor, pain management, delivery, and newborn care.
- Advocates for patient care by implementing best practices to ensure the safe delivery and healthy outcomes for both mothers and babies, fostering a supportive and nurturing environment throughout the perinatal experience

Registered Nurse - Neonatal Intensive Care Unit, September 2003 – December 2021

Mass General Brigham - Boston, MA

Collaborated with healthcare professionals from diverse disciplines to develop, implement, and oversee individualized care plans aimed at enhancing patient health and facilitating recovery of critically ill neonates.

Key Initiatives:

- Assessed, evaluated, and provided care for neonates in a level III 66-bed Neonatal Intensive Care Unit.
- Administered medications and fluids and monitored vital signs on critically ill newborns.
- Effectively communicated with family members and loved ones to deliver comprehensive information regarding patient care, treatments, and medical options.

EDUCATION AND TRAINING
