PROFILE

Board-certified internal medicine physician and actively practicing direct care hospitalist at Huntington Hospital in Pasadena, California, managing an inpatient census of up to 15–20 patients on daytime rounds. His first five years of attending practice were 50–75% night coverage, with up to 10 admissions a night. Physician Advisor to Utilization Management, working with hospital leadership on medical necessity, inpatient versus observation status and documentation standards. Independently of his hospital employment, and through his professional corporation, provides standard-of-care and causation review in hospital medicine matters for plaintiff and defense counsel.
