

SIMONE J JORDAN, DC, DACBR

EDUCATION

Doctor of Chiropractic – Southern California University of Health Sciences - Whittier, CA, 2016

Bachelor of Arts: Human Performance – University of Southern California - Los Angeles, CA, 2011

PROFESSIONAL EMPLOYMENT/APPOINTMENTS

Diplomate, American Chiropractic Board of Radiology – American Chiropractic Board of Radiology, **July 2021 to present**

- Provide consultation in health care facilities to meet the needs of referring doctors and their patients. Recommend, supervise, and interpret radiologic studies as well as advanced imaging procedures. Advise referring clinicians on the necessity and appropriateness of radiologic services and whether to select or to avoid certain diagnostic or clinical procedures.

Assistant Professor/Full-Time Faculty – Southern California University of Health Sciences, **Jan 2020 to present**

- Teach assigned classes in accordance with current course outlines and objectives. Review and update course outlines, text selection, and syllabi in cooperation with the department faculty and department chair. Use appropriate teaching strategies and methods such as active learning, lecture, laboratory, and self-paced instruction. Modify teaching methods based on assessment results and best practices in teaching and learning. Document modifications in course content or instructional methods based on student and course assessment results/feedback. Perform regular evaluations of student performance.

Resident, Diagnostic Imaging – Los Angeles College of Chiropractic, **Jan 2017 to Dec 2019**

- The residency in Diagnostic Imaging at the Los Angeles College of Chiropractic (LACC) is a full-time, three-year, in-house residency designed to train residents in all aspects of diagnostic imaging with an emphasis on interpretation of musculoskeletal imaging, including radiography, computed tomography (CT), and magnetic resonance imaging (MRI).
- Duties as a resident include but not limited to communicating examination results or diagnostic information to referring physicians, patients, or families; confer with medical professionals regarding image-based diagnoses; preparing comprehensive interpretive reports of findings; participating in research projects involving radiology.

TEACHING EXPERIENCE

Lead Faculty:

- **Radiographic Positioning and Technology:** This intermediate level course focuses on the skills and knowledge necessary to produce optimum quality radiographs in the clinical setting. Various aspects of patient positioning, factor calculation, and film development are presented throughout this course.
- **Diagnostic Imaging Basics and Anatomy:** This is an introductory level course pertaining to the appearance of both osseous and soft tissue anatomy as visualized on plain film radiographs and to a lesser extent advanced imaging. Anatomic areas covered include the spine, extremities, chest, and abdomen.
- **Comprehensive Radiology Review:** This is a review style course covering clinical radiology topics including conditions that encompass congenital, arthritis, trauma, blood/vascular, infection, tumors, endocrine/metabolic, and chest/abdomen conditions.

Assisting:

- **Imaging Interpretation I:** This is an advanced level course that is focused on developing search patterns for radiographic identification and interpretive skills. The course will cover the roentgen signs of bone and joint disease, general concepts of bone tumors and musculoskeletal trauma, infection, metabolic, endocrine, hematologic and congenital disorders.
- **Imaging Interpretation II:** This is an advanced level course that is focused on developing search pattern and radiographic identification/interpretive skills. The course will cover the radiographic appearances of pathologies affecting the spine, lower extremity, and upper extremity.
