

WARREN

THE WARREN GROUP, INC. FORENSIC ENGINEERS & CONSULTANTS
7805 ST. ANDREWS ROAD | PO BOX 1608 | IRMO, SOUTH CAROLINA 29063
TEL 803.732.6600 FAX 803.732.7576 ↓↓ WARRENF0RENSICS.COM

Thomas J. Kelly P.E., MSEE, MBA, CFEL, CESCP

Electrical Engineer

Electrical Equipment Failure Analysis

Electrocution and Electric Shock Accidents

Fire and Explosion Analysis: Origin and Cause

Industrial Electrical Accidents

Lightning Strike Analysis

Robotics & Automation/Control System Analysis

Scope of Damage – Estimate of Repair

EDUCATION

1990	Bachelor of Science, Electrical Engineering Florida Atlantic University, Boca Raton, Florida
1998	Master of Science, Electrical Engineering Florida Atlantic University, Boca Raton, Florida
2015	Master of Business Administration Winthrop University, Rock Hill, South Carolina

EXPERIENCE

2017 to Present	The Warren Group, Inc., Irmo, South Carolina. Senior Consulting Engineer performing specialized consulting related to property damage and injuries involving electrical equipment, devices, wiring, connections, and other related electrical hardware, electrical fires and failures, arc flashes, electrocutions, shocks and other electrical injuries to people, electrical control system engineering, electrical design and safety.
----------------------------	--

Fire & Explosion Analysis

Determine the origin and cause of fires and explosions; determine the scope of damage resulting from fires and explosion.

Fire and Life Safety Standards and Codes Compliance

Evaluate compliance with building, fire protection and life safety codes and standards. National Fire Protection Association (NFPA) Codes, OSHA Regulations, International Building Codes, Uniform Building and Fire Codes, materials and product codes and standards.

Electrical Distribution Systems Analysis

Evaluate low and medium voltage electrical distribution system failures and damage in residential, commercial and industrial installations. Evaluate damage to plant and premise cabling, electrical switchgear, electrical panelboards and transformers. Evaluate damage to electrical components for electrical surge incidents such as lightning.

Control System Analysis

Electrical and mechanical control systems including relay, PLC and PC based systems and Distributed Control Systems (DCS) including Supervisory Control and Data Acquisition (SCADA) systems. AC and DC motor control and industrial process controls including flame supervision systems, automated assembly systems including robotics, and building automation systems.

EXPERIENCE, Continued

**April 2017
to Present
(Continued)**

Property Loss Analysis

Determine the cause of the loss, establish scope of damage, estimate cost to repair, evaluate replacement cost, estimate time required to complete repair.

Safety Design Analysis (both personal injury and property damage)

Industrial accident reconstruction, machine controls, warnings, OSHA compliance, standards and codes compliance, maintenance, fire and explosion analysis, products liability, product failures, electrical failure analysis

2016 to 2017

Crump Engineering Works, Charlotte, North Carolina, Consulting Engineer. Professional consulting, design and forensic engineering services related to fire cause and origin, control system failures, buildings, industrial systems, data centers, property, safety, causation, scope of damage and value of loss, lightning damage evaluation, and compliance evaluation relating to specifications, codes and industry standards.

2013 to 2016

Radisys Corporation, Hillsboro, Oregon, Senior Field Application Engineer. Pre-sales engineering support for 3G and LTE communication protocol software stacks for defense, aerospace, public safety, and test and measurement applications. Provided support for embedded computer and network switch products. Designed, developed and implemented proof-of-concept systems to demonstrate capabilities for customer applications. Provided training and diagnostic assistance for femtocell and picocell communication systems.

2008 to 2013

General Dynamics Armament and Technical Products, Inc., Charlotte, North Carolina

Facilities Manager - Managed multi-site manufacturing and office facilities. Evaluated facility conditions for building envelope performance, energy consumption and lighting performance and compliance. Determined capital improvement projects and analyzed energy usage. Managed critical data center infrastructure including fire suppression systems and emergency power systems for multiple site locations.

Engineering Manager - Provided engineering management oversight to Advanced Programs development group. Designed, developed and implemented rapid prototypes in tactical communication systems, vehicle data integration in HWMVV, MRAP and M-ATV platforms, and deployable environmental management systems to meet customer demonstrations and project requirements. Prepared technical and management content for customer proposals to meet business needs.

EXPERIENCE, Continued

- 2008 to 2013
(Continued)** Senior Principal Systems Engineer - Designed, developed and implemented rapid prototype systems to meet customer demonstrations and project requirements. Lead project engineer for containerized environmental control system for forward base deployment. Designed and developed in-vehicle network systems to enhance combat situational awareness. Designed optical and acoustic detection systems. Conducted research in high-energy laser weapon systems. Prepared technical proposal content to meet business needs.
- 2005 to 2008** Engineering Design & Testing Corp., Charlotte, North Carolina, Consulting Electrical Engineer. Specialized consulting in the cause and scope of damage to commercial, industrial, and residential facilities. Perform origin and cause investigations of fires and explosions. Evaluation of damage to electrical switchgear, distribution panels, transformers and components in residential, commercial, and industrial facilities. Evaluate electrical surge, lightning and arc flash incidents. Evaluate cause and scope of damage to data, voice and fiber optic cabling. Evaluate failures of commercial and industrial control systems and building automation systems. Perform analysis for compliance to building, fire protections and life safety standards. Perform evaluations for cause of damage, repair or replacement costs, and construction evaluation.
- 1997 to 2005** Florida Atlantic University - College of Engineering, Boca Raton, Florida, Engineer and Director of Technical Services. As the Chief Engineer of the Robotics Center, designed, prototyped, and implemented manufacturing assembly lines and fixtures. Provided technical and research support for machine vision, laser measurement, and other calibration devices. Provided computing, laboratory services, card access and CCTV security support. Coordinated space and construction needs and managed renovation projects for the college.
- 1990 to 1997** Florida Atlantic University - Physical Plant, Boca Raton, Florida
- Interim Director and Assistant Director - Managed computing resources for division-wide Local Area Network. Oversaw day-to-day operations of work management system. Managed building maintenance, custodial and grounds service contracts for an 800-acre campus consisting of approximately two million gross square feet.
- Senior Systems Programmer/Systems Programmer/Programmer - Managed computing resources for division-wide Local Area Network. Planned and implemented changes to keep pace with network growth and user needs.

EXPERIENCE, Continued

1990 to 1997 (Continued)	<p>Designed, coded, and installed new software applications and maintained existing applications to meet needs. Oversaw day-to-day operations of work management system. Performed analysis of system data to provide performance indicators as needed to department managers.</p> <p>Engineering Assistant - Prepared campus floor plans, maps and master building plan drawings.</p>
1988 to 1990	<p>Johnson Controls, Miami Branch, Hollywood, Florida.</p> <p>Engineering Intern - Performed duties of Branch Automation Technician, including maintenance of branch computing resources and design and implementation of software for HVAC systems. Installed, calibrated and maintained computer-based HVAC, fire and security systems.</p>

SUMMARY OF SELECT TECHNICAL KNOWLEDGE

Hardware

Thorough understanding of the operations and troubleshooting of ISA, PCI, VME and S-BUS compatible systems. Proficient in the use of standard test equipment including, but not limited to, digital and analog meters, oscilloscopes, spectrum analyzers, logic analyzers, signal trace equipment, and computer simulated circuit analysis. Comprehensive knowledge in the operation, maintenance, and calibration of various types of 4-DOF and 6-DOF manufacturing robots, PLCs and CNC machine tools. Experienced in the use, installation, termination, and splicing of indoor and outdoor low voltage data cable and fiber optic cable.

Codes and Standards

Project work including design to and verification of compliance of Code and Standard elements including for the following:

- National Electric Code (NFPA 70)
- Electrical Standard for Industrial Machinery (NFPA 79)
- National Fire Alarm and Signaling Code (NFPA 72)
- National Life Safety Code (NFPA 101)
- Electrical Safety in the Workplace (NFPA 70E)
- ANSI/ASHRAE/IESNA Standard 90.1, Energy Standard for Buildings Except Low-Rise Residential Buildings
- RS-232, RS-485 and RS-442 communication protocols
- IEEE 802.3, 802.5, and 802.11a/b/g/n network standards
- MIL-STD-1275D Characteristics of 28 Volt DC Electrical Systems in Military Vehicles
- MIL-STD-810G Environmental Engineering Considerations and Laboratory Tests
- MIL-STD-461F Electromagnetic Interference Characteristics

CERTIFICATIONS

Certified Electrical Safety Compliance Professional (NFPA)
Certified Mobile Elevated Work Platform Operator
Certified Fire & Explosion Investigator (NAFI)
Certified Level 1 Thermographer (FLIR)
Community Emergency Response Team (CERT) Member, Boca Raton Fire Department,
FEMA Emergency Management Institute Certification May 2001
Registered FAA Remote Pilot (sUAS)
FCC Amateur Radio general license, call-sign KG4AKO
FCC General Mobile Radio Service (GMRS) license, call-sign WSBY891
Certified Level I Thermographer (FLIR) – Infrared Training Center
Certified Telecommunications Network Specialist (CTNS)

PROFESSIONAL ORGANIZATIONS AND AFFILIATIONS

Certified Electrical Safety Technician (CEST) Certification Advisory Group (NFPA)
Institute of Electrical and Electronic Engineers (IEEE)
IEEE Product Safety Engineering Society
InterNational Electrical Testing Association (NETA)
National Association of Fire Investigators (NAFI)
