FORENSIC DOCUMENT EXAMINATION SIGNATURE HANDWRITING ANALYSIS FINGERPRINT ANALYSIS DIGITAL OVERLAY PROCESS & ACCURACY

We place one signature, writing, or document on top & overlaid the other, resulting in digital overlays for comparison; Analyze pen strokes, stylus, starts, stops, corrections, deletions, erasures, alterations, obliterations, consistency, curves, flourishes, flow, slant/tilt, hook, style, lifts, lines, loops, alignment, spacing, the linking of letters, pressure, tremors/shakiness, smudging, dips, diacritic marks (i-dots, t-crosses), jots, size, & scale; Examine documents (paper) for folds, creases, spots, stains, discoloration, & copy lines; Detect the use of & differences in pens used to sign or print; Use integrated analysis of ink & paper, visual, comparative, mathematical, & statistical methods. While there are other (different types of) signature analysis processes, including Electrostatic Detection Apparatus (ESDA), Gas & Thin-Layer Microspectrophotometry (infrared, ultraviolet) & stereomicroscopic (three-dimensional) analysis, statistical, Computer Assisted Handwriting Examination (CAHE), Artificial Intelligence, & Machine Learning, Digital methods yield greater accuracy (approximately 95%) & digital methods reduce subjectiveness (IGI Global, 2026) because of the direct overlay. Digital Overlay process passes the scientific test (graphology) for handwriting analysis encompassing the appropriate characteristics (pen strokes, etc. as named above) necessary to draw forensic conclusions.

PURPOSE

The purpose of Signature Analysis is to detect forgeries, alterations, copyright violations, & such crimes. It is not a crime to copy signatures, art, documents, or other materials for the purpose of forensic analysis. The signatures, art, & materials used in the analysis are used for the sole purpose of analysis, will not be used for any other purpose, & must not be copied for use by others for any reason without the documented permission of the court, attorney, client, signature, or document owner(s). Use without permission constitutes crime & incites liability. Unauthorized use of this document violates privacy & HIPAA laws & will be prosecuted.

Exception: We reserve the right to use clips that will not allow the distinguishment of signatures into our advertising.

WILL OUR PROCESS HOLD UP IN COURT?

Yes. Our Affidavits are certified court-ready legal documents. Judges take them seriously.

RETAINER

For signature analysis, we require the full amount up front. Although I may show you portions of our work before the Analysis Report is complete, I will not release the full completed document until the analysis is paid in full as explained below.

A signature analysis is not complete until all pertaining signatures have been analyzed. Like any signature analyst, we may, based on our analysis, find it necessary to involve law enforcement, including contacting the sheriff, police, FBI, Department of Human Services, or other parties.

Ask us for a copy of our SIGNATURE ANALYSIS CONTRACTUAL AGREEMENT for your consideration.

COURT FEES: Our Affidavits are complete in and of themselves so that it is not necessary for us to attend court after we have completed an Affidavit for you; however, if you or your attorney would like us to attend court to undergo examination & cross examination and if your hearing will only last 1 hour, we charge \$90.00, which includes prep time and the hearing reservation and schedule.

ART FORGERY / ART FRAUD ANALYSIS @ \$4500. We detect fakes via digital overlay. We fly to you if needed; you cover flight & rental car.

CORPORATE STRATEGIST, BUSINESS ANALYST: We increase your profits / expedite & grow your business. Exponential return on investment (ROI). Marketing analysis included.

PRIVATE INVESTIGATION: We bust corporate and government corruption en mass as we did Indiana Voter Fraud, Jeffrey Epstein Real Estate Fraud, and ServiceSource Corporate Fraud. We catch people's fiancées, partners, & spouses cheating. Don't date a prospect until we've investigated him or her thoroughly. You'll prevent financial loss and personal ruin and protect against sexually transmitted disease.
