

The Falcon Group

ENGINEERING, ARCHITECTURE, ENERGY CONSULTANTS & RESERVE SPECIALISTS

William J. Pyznar, B.S.A.E., B.S.C.E., P.E. Principal

Profile:

Mr. William Pyznar is the Managing Principal for engineering design and project management for the firm's building-related work, in addition to overseeing the daily operations of the firm. Included in his responsibilities are inspections and analysis of building components and structures, preparation of testing requirements and procedures and the preparation of condition reports. Mr. Pyznar's experience is in both residential and commercial construction, including low-, mid- and high-rise structures.

Specifically, Mr. Pyznar has extensive experience in building water infiltration detection and waterproofing designs, building ventilation issues, low-slope and steep-slope roofing designs, façade repair and replacement designs, fire separation requirements, sound attenuation and insulation requirements. He is also responsible for the analysis and remedial design of structural failures and deficiencies in frame construction, parking garages and masonry construction buildings. He is an expert in the building envelope, including aspects of roofing, building façade issues and coverings including veneer walls and attachments, Exterior Insulation and Finish systems (EIFS), and traditional siding and stucco systems.

For private clients, Mr. Pyznar is responsible for our Fast Track Project Remediation Service for those that have suffered catastrophic losses from flood, fire or other disasters. Heading the team, he works with the owners, management and local authorities to provide time efficient remedies to each situation.

Mr. Pyznar works closely with integrating the firm's energy-related projects concerning building design, and implements an overall holistic approach to building upgrades, improvements and energy efficiency projects.

Mr. Pyznar has extensive involvement in investigation and the preparation of documentation in support of claims and litigation related to construction defects and deficiencies including providing professional testimony; he has also assisted numerous clients on the successful pursuit of material failure claims.

Mr. Pyznar's additional responsibilities include, design of plans and specifications of reinforced concrete structures, including retaining walls, slabs balconies and footings, development of plans and specifications of timber structures, including remedial modifications to both multi-family and common facilities, preparation of plans and specifications for mechanical support systems and masonry support structures.

Education:

Bachelor of Science,
Architectural Engineering,
Drexel University

Bachelor of Science, Civil
Engineering, Drexel University

Licenses/Certificates:

Licensed Professional Engineer –
P.E.:

Connecticut

Delaware

Florida

Maryland

New Jersey

New York

Pennsylvania

Vermont

Virginia

Washington D.C.

Certified Exterior Insulation
Finish Systems (EIFS) Special
Inspector, NJ

Certified Forensic Structural
Inspections: Examination,
Diagnosis and Remedy for
Building Structures

Certified Concrete Fundamental
Methods and Principles, New
Jersey
